## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114 was filed in this application after a decision by the Board of Patent Appeals and Interferences, but before the filing of a Notice of Appeal to the Court of Appeals for the Federal Circuit or the commencement of a civil action. Since this application is eligible for continued examination under 37 CFR 1.114 and the fee set forth in 37 CFR 1.17(e) has been timely paid, the appeal has been withdrawn pursuant to 37 CFR 1.114 and prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on June 20, 2005 has been entered.

### ***Allowable Subject Matter***

2. Claims 11-32 are allowed. The following is an examiner's statement of reasons for allowance: With respect to claims 11, 18 and 24, the most relevant prior art of record, Chavez, Jr. (6,018,666) teaches a cellular radio system, a cellular radio terminal and a method to realize cell prioritizing in a cellular radio system which include terminals and a network including stationary network equipment of which the terminals are arranged to set up and maintain radio communications with base stations in the cells, wherein at least one terminal is arranged to favor at least one cell with respect to other cells in a manner independent of other terminals based on data specific to that terminal stored in and received from the network, Wang (5,649,289) teaches the use of a user's office or home location in assigning a cell of preference, Wang further discloses using indexes in determining cells which are considered part of a preferred list for a customer

paging area for a mobile subscriber and **(European Telecommunications Standards Institute), ETS 300 535 (GSM 03.22 version 4.10.0)** teaches that for cell re-selection in cell prioritization, a hysteresis factor as well as an offset value can be used in determining a parameter (C2). The instant invention discloses one terminal being arranged to favor at least one cell with respect to other cells in a manner independent of other terminals based on a priority data transmitted to the at least one terminal in a priority identity message, the priority data comprises at least a priority cell identity and at least one offset parameter. The above underlined novel feature is not taught, fairly suggested or made obvious by Chavez, Wang or ETSI alone or in combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
